

CPOSAT

Christian Perspectives on Science and Technology

Prizes for 2023 Journal Articles in *Christian Perspectives on Science and Technology*

ISCAST is pleased to announce that it will award three prizes for the best articles published this year in the ISCAST journal, *Christian Perspectives on Science and Technology* (CPOSAT).

The prizes, of AUD 500 each, are kindly supported by [ARTFInc](#) and a private donor. The private donor's prize will go to the best article published by a postgraduate or emerging researcher, naming the prize after Professor John White FRS, former president of ISCAST who recently passed away.

Last year's awards for outstanding contributions to CPOSAT were:

- Marius Dorobantu: *Imago Dei in the Age of Artificial Intelligence: Challenges and Opportunities for a Science-Engaged Theology*
- Graeme Finlay: *Evolution as History: Phylogenetics of Genomes and Manuscripts*
- Carolyn King: *Genesis 1–3 as a Resource for Twenty-First Century Faith*
